Work Experience

Thoughtworks

Apr 2022 - present

Consultant

- Working as a senior developer on an e-commerce project. Contributing to frontend, BFF, and gateway layer with a major focus on UI.
- Collaborate with designers, product managers, and other developers to implement new features and improvements.
- Worked on various performance and security improvements in frontend and gateway layers. This resulted in ~40% reduction in bundle size.
- Refactored CMS integration flows on the server side to improve code quality and maintenance.
- Created different Kibana dashboard widgets to improve monitoring.
- Extensively worked on the analytics layer, where different events are sent to Adobe Analytics from the UI layer.
- Optimized docker files for the project to reduce the final image size and increase build speed.
- Collaborated with the infra team to integrate Github actions for multiple repositories.
- Mentoring junior developers and providing code reviews to ensure code quality and maintainability.

Infosys

Sep 2020 - Apr 2022

Technical Analyst

1 years 7 months

- Creating and mapping AEM components to Angular components.
- Extensive experience to create the Sling models, servlets, schedulers, and event listeners.
- Have worked on multiple Angular version updates up to version 12.
- Extensively used NGXS library for state management
- Good experience of integrating D3.js with angular
- Assisting in technical analysis and solution design of stories.
- Performed root cause analysis to provide resolutions for production issues.
- Working on sprint Stories and supporting Sprint Demo.
- Writing quality code by maintaining code coverage above 90% and lint-free.
- Mentoring new team members.

Infosys

Sep 2018 - Sep 2020

System Engineer

2 Years

- Creating and extending AEM components.
- Developing templates from Invision designs.
- Worked in Angular js components to Angular 8.
- Creating lazy loaded dynamic components that can be used by angular elements.
- Creating NGXS stores and reducers to maintain complex states.
- Enhancing and implementing new designs by using Angular Material, Slick carousels, and QR generator libraries.

Certificates and Awards

- Certified AEM Developer Expert
- Letter of Appreciation:** Received appreciation for being able to skill up quickly and for my consistent delivery.
- Insta Award:** Received for being a go-to person for other developers in the team and mentoring new developers.
- Winner of Client Hackathon:** Created an e2e customer journey to buy products from the portal.

Career Objective

My objective is to leverage my expertise in modern web development frameworks and technologies to design and implement high-performance, scalable, and responsive web applications. I aim to work with cross-functional teams to deliver user experiences that are visually appealing, easy to use, and accessible to all users. I strive to lead by example, mentoring and guiding junior developers, promoting code quality, and adhering to best practices.
